The SC-8910-DVF is a Fixed Dome camera for indoor applications, and can be easily mounted to a wall or ceiling. This camera features 550 TV Lines resolution provided by High Sensitive 1/3 inch SONY Super HAD CCD and creates clear premium-quality color images.

These cameras offer a choice of vari-focal auto-iris lens, which is a great advantage, because they can be adjusted to choose a variety of focal distances and angles of view. The Auto Tracking White Balance (ATW) function improves picture quality and color reproduction in variable light settings. Automatic Gain Control (AGC) automatically adjusts the video quality in low light condition. Back Light Compensation (BLC) electronically compensates for high background lighting to give detail which would normally be silhouetted. This camera also features Automatic Level Control (ALC) function, which means that the camera can bring out detail in bright or dark areas of an image. If too much sunlight makes an image too dark, ALC can focus on the needed image.

The camera can be operated under a very wide range of temperature (-10°C to +60°C) without safety concern.
